

Frequently Asked Questions (FAQs)

Mathematical Foundations for Machine Learning

Course Code: AIMLC ZC416

Semester: I Semester 2026-27

1. Course Materials and Resources

1.1 Where can students access the course handout and learning materials?

All course-related materials, including the detailed course handout, announcements, and learning resources, will be made available exclusively through the **Learning Management System (LMS)**.

1.2 Are textbooks or reference books provided as part of the course?

No. Students are required to independently procure the prescribed textbooks and reference materials listed in the course handout.

1.3 Where are lecture slides uploaded?

Lecture slides will be uploaded to the course page on the LMS at least **four days prior** to the scheduled lecture.

1.4 Where can students find faculty notes?

Faculty notes, provided in **PDF format**, will be uploaded on **MS Teams** under the **“Class Materials”** section after the completion of each class.

2. Attendance, Learning Approach, and Time Commitment

2.1 Is attendance in weekly classes mandatory?

Yes. Regular attendance is mandatory, and active participation in class discussions is essential for effective learning and successful completion of the course.

2.2 Is it advisable to rely only on recorded lectures and study shortly before examinations?

No. This approach is strongly discouraged. Students are expected to attend live sessions regularly and engage with the course content consistently throughout the semester.

2.3 What is the role of webinars in this course?

Webinars are structured problem-solving sessions that include brief revision of key concepts and discussion of questions from previous semesters.

2.4 How much time should students allocate weekly for this course?

Students should plan to spend approximately **six hours per week** on self-study, practice, and revision, in addition to attending scheduled classes and webinars.

3. Quizzes, Assignments, and Submissions

3.1 How many quizzes and assignments will be conducted during the semester?

The course includes **two quizzes and two assignments**.

3.2 Are make-up quizzes or assignments allowed?

No. Make-up opportunities are not provided. Failure to attempt any quiz or assignment will result in the loss of marks for that component.

3.3 Are extensions granted for quizzes or assignments?

No. Deadlines are strictly enforced, and extensions will not be granted under any circumstances.

3.4 Will solutions for quiz questions be shared?

No. Solutions to quiz questions will not be released.

3.5 Will assignments submitted after the deadline be considered?

No. Assignments submitted after the specified deadline will not be considered, irrespective of the duration of the delay.

3.6 Are assignments submitted via email evaluated?

No. Assignments submitted via email will not be accepted or evaluated.

3.7 What happens if an incorrect document is submitted as an assignment?

Such submissions will receive **zero marks**, and no resubmission opportunity will be provided. **Zero marks** will be awarded if the document can not be opened or if it is encrypted.

3.8 Will assignments saved in draft mode be evaluated?

Assignments saved in draft mode prior to the deadline will be considered for evaluation.

3.9 I submitted my assignment late via email and received no response. Why?

Requests seeking exceptions to clearly stated submission policies will not be responded to. This policy applies uniformly to all students.

4. Examinations and Evaluation

4.1 Will answer keys and marking schemes be provided for examinations?

Yes. Answer keys and marking schemes will be shared for both the mid-semester and comprehensive examinations.

4.2 Are previous semester question papers available?

Yes. Question papers from previous semesters will be uploaded on the LMS.

4.3 What are the passing criteria for this course?

The course follows a **relative grading system**. There are no fixed minimum passing marks.

4.4 Is the make-up examination more difficult than the regular examination?

No. The regular and make-up examinations are designed to be of comparable difficulty levels.

5. Communication and Support

5.1 What is the official mode of communication for this course?

All official communication will be sent to the student's **WILP email ID**. Students are advised to configure this email account on their mobile devices to receive timely notifications.

5.2 How can students seek clarification or resolve doubts?

Students may use any of the following official channels:

- Posting queries on the discussion forum
- Sending an email to the Learning Facilitator (LF)
- Raising questions during live class sessions

5.3 Can students contact faculty or LFs via MS Teams for queries?

No. MS Teams is not an approved platform for academic queries or course-related communication.

6. Experiential Learning Components

6.1 When should experiential learning exercises be completed?

Each experiential learning exercise is mapped to a specific lecture number. Students are expected to follow the prescribed lecture-wise schedule.

6.2 What programming language should be used for experiential learning components?

Python is the preferred programming language. However, students may use other programming languages if required.
